Announcing RVL Hacker, a PC game by rvl games studios.

Bucharest, Romania, European Union, September 2, 2009

rvl games is pleased to announce RVL Hacker, the PC action game in which you play the role of a computer hacker. The game uses the Hacker Evolution game engine from exosyphen studios, to offer a unique game environment using the latest available technologies.

About the game:

Using the Botnet Network, which was created after the infestation of millions computers with the virus Downadup, a large scale distributed attack has been launched. A large number of computers from all over the world were victims of the attack, which lasted for a few hours. After the incident the entire internet infrastructure was left in a disturbed state and many security systems were overloaded with data traffic.

Use your intelligence to stop another catastrophic attack over the Net.

Alex D. is a programmer that works at a software company during the day, and during the night he is testing software vulnerability on companies servers. During one night he is attacking a cover up firm for a NSA operations and gets caught.

In exchange of his freedom Alex D. accepts to fulfil secret missions for the NSA.

The concept behind RVL Hacker is to create a game that challenges the gamer's intelligence, attention and focus, creating a captivating mind game. Solve puzzles, examine code and bits of information, to help you achieve your objectives.

RVL Hacker Pricing and Availability:

RVL Hacker requires Microsoft Windows 98/ME/2000/2003/XP/Vista and costs \$14.95(USD). Additional information, as well as a free demo version, are available at: <http://rvlgames.com>

About RVL Games:

RVL Games was founded in 2009 and focuses primarily on casual game development. We are a small dedicated team with some experience in game industry and we want to ensure our customers are 100% satisfied with our products and services.
